

The Ideal Solution for a Variety of Scenarios—Perfect for the Business Person Who Wants to Stay a Step Ahead

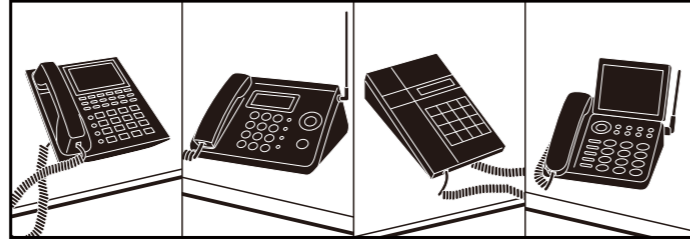

You're away from the office when an urgent matter comes up.
Connect your cell phone and conduct a voice conference with the main office.

You're meeting with a client and are confronted with a difficult technical question ... Not a problem. Just take out your R-Talk 800EX, plug it into your cell phone or smartphone, and call the office. Easily converse with the engineers through voice conferencing and you'll never miss an important business opportunity again!

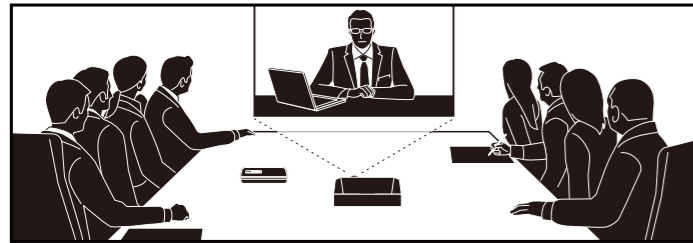

Each conference room has a different telephone system.
No time-consuming setup means voice conferences start easily and quickly.

A meeting with a branch office is suddenly scheduled. No need to worry about the type of phones in the conference rooms. Plug the R-Talk 800EX into any business phone, whether analog or IP. No complicated setup is required, making voice conference preparation simple and fast. The R-Talk 800EX is your best option in a race against time.

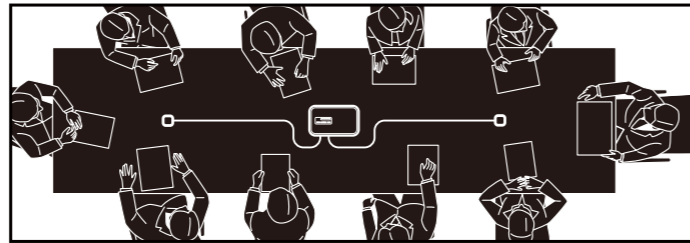

Teams in different locations need to communicate.
Clear audio eliminates stress no matter how long the web conference.

The development and sales teams need to share video images of a prototype over web conferencing. Simply plug the USB cord from the R-Talk 800EX into your computer for web conferencing audio with peace of mind. R-Talk's sophisticated audio design ensures clear, crisp audio even when powered directly from the USB, for a stress-free meeting.

Voice conferencing with large groups of people—
This single unit clearly picks up everyone's voice, even in large groups.

The R-Talk 800EX is the perfect instrument for voice conferencing between large groups of people at the main office and branch office. Plug in up to a maximum of four extension mics to clearly detect up to ten different voices. This is the perfect tool for maximizing business productivity by reaching consensus on a range of topics in one meeting.

NTT Advanced Technology Corporation

Voice Conferencing Mic / Speaker

R-Talk 800EX

Easy enough for anyone to use anywhere, providing true audio on any type of telephone

Slim & Compact Extraordinarily Mobile Voice Conferencing Reaches a Whole New Level

Speed is critical to business success.

For example, you're out of the office at a meeting

when you're suddenly confronted by a decision that has to be made.

When time is of the essence, precise information becomes even more important.

Small enough to go anywhere without compromising audio clarity,

the R-Talk 800EX is the ideal tool in a continually evolving business world.

Introducing the new standard in voice conferencing.

Actual size

The R-Talk 800EX Makes Our 3“R”s a Reality

Real

Clear, crisp audio—the result of years of NTT research and development

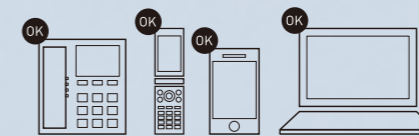

Noise

Echo

Echo cancellation technology pioneered by NTT Cyber Space Laboratories generates high-quality, extremely reliable audio for smooth conversations. Auto Gain Control automatically adjusts the volume, and Noise Suppression Technology cuts out ambient noise. These technologies eliminate the stress involved in voice conferencing by delivering clearer, crisper audio.

all-Round

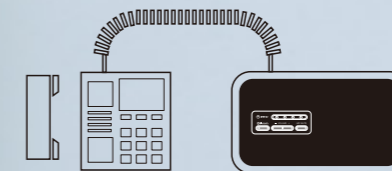

Use anywhere with any network connection, such as landlines, cell phones, and computers

Compact enough to fit in a briefcase, it can be used anywhere you may find yourself. Runs on batteries, as well as powered directly from a computer USB port for web conferencing. Can also be used with cell phones, smartphones, and both analog and IP landline phones. This single device makes it possible to voice conference on any type of telephone call.

Right now

No complicated setup. Simple interface means instant accessibility.

Unplug the receiver cord from the telephone handset, plug in the R-Talk, and you're ready to conference. Dial the phone number in the usual manner and begin voice conferencing. No need to install drivers in order to connect to a computer. Simply plug the USB cord in. No complicated setup required. R-Talk is simply designed to be easy for anyone to use.

Ideal for:

- Voice conferencing on-the-go
- Voice conferencing at low cost
- Web conferencing with clear audio
- Avoiding time-consuming, complicated setup
- More effective use of time and fewer business trips
- Communicating with the head office when away
